## Work History

2019-09

- present

### Web Developer

*Freelancer, Łódź*

[www.kacperhernacki.pl](http://www.kacperhernacki.pl)

Started with fundamental experience of programming, during first year of work I have mainly learned html, css and vanilla JS. Since 2020 I have begun working with React JS and Firebase, developing many projects for portfolio. Moreover, I got acquainted with basics of MongoDB, node.js. 2021 is the year when I improved skills in both front-end and backend.

Front-end was diversified by adding experience with:

- 3D graphic library (react-three-fiber),

- Next.js,

- headless CMS (sanity.io).

Back-end was diversified by:

- developing e-commerce web platform with stripe payments, using node.js and firebase cloud functions.

Additionally, in january 2021 I have started an instagram account in which I share my modest experience with other users.

What is more, in may 2021 I have launched a blog (<https://www.thedevsuniverse.com>) about web developing.

## Education

2014-08

- present

### Military University of Technology, Warsaw

*Master of Science, Electronics and Telecommunication*
